# cGMP CONTRACT DEVELOPMENT & MANUFACTURING ORGANIZATION

With an 100% batch approval rate and 10+ years of biologics expertise, Advaxia is trusted by pharmaceutical and biotech companies throughout the world.

## EXPRESSION SYSTEMS

We possess extensive experience in generating high quality/GMP enabling materials such as cell lines and virus seed stocks.

## PROCESS DEVELOPMENT

We blaze new trails in biologics development & manufacturing, by translating leading-edge research data into hands-on, reproducible production know-how that will maximize your probability of success in the clinic.

## ANALYTICAL DEVELOPMENT

Our laboratory possesses industry-leading equipment, software and scientists who specialize in method development, phase appropriate qualification and validation.

## cGMP MANUFACTURING

We have perfected a wide array of adenoviral production platforms, in alignment with the latest industry best practices and regulatory guidelines.

## QUALITY CONTROL

Our dedicated QC team relentlessly seeks out opportunities to improve our capabilities, equipment, staff training and operational standards.

## QUALITY ASSURANCE

We have developed detailed protocols and practices to improve and streamline the QA process across all our project workflows.

## REGULATORY SUPPORT

We provide CMC support throughout every stage of the clinical regulatory process, from drafting to clinical filing, to help maximize the probability of success for approval.

Advaxia is a leading innovator in the areas of vaccine research, development and biologics manufacturing.
